

LABISH ROOPANI

Computer Science Student | AI & Software Development Enthusiast

Hyderabad, Sindh, Pakistan • labeshroopani@gmail.com • +92 309 398 9404 • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Motivated Computer Science student at Sukkur IBA University with hands-on experience in AI-based systems, mobile app development, and automation tools. Proficient in Python, Flutter, and computer vision technologies, with growing expertise in React Native. Passionate about building intelligent solutions, solving real-world problems, and pursuing a career in AI and Data Science.

EDUCATION

Bachelor of Science in Computer Science | Sukkur IBA University, Mirpurkhas Campus | Aug 2023 – Present

Intermediate (Pre-Engineering) | Shah Abdul Latif Degree College, Mirpurkhas | 2018 – 2020

Matriculation (Science) | The Stepping Stone High School, Mirpurkhas

EXPERIENCE

Freelance Software Engineer | Independent | 2024 – Present

- Developed and deployed 6+ custom software applications, including Aura (mood journal app) and a Tailor Management System.
- Designed clean, responsive interfaces and structured database architectures (Firebase, local databases) for clients.
- Provided end-to-end support, including system optimization, API integration, and post-launch maintenance.

PROJECTS

AI Sales Agent | Tech: Python, AI APIs

- Developed an AI-powered sales assistant to automate customer interactions and handle repetitive sales queries.
- Implemented intelligent NLP-based response handling to improve response efficiency and reduce manual effort.

AI Excel Agent | Tech: Python, Excel Integration

- Built an AI-powered system to manage Excel data using natural language commands (add, update, delete, search).
- Significantly reduced manual data handling time through intelligent automation.

YouTube Gesture Controller – AirPointer | Tech: Python, OpenCV, MediaPipe

- Developed a real-time touchless control system for YouTube using hand-gesture recognition via OpenCV and MediaPipe.
- Achieved accurate hand tracking with sub-100ms response, eliminating the need for keyboard or mouse interaction.

Smart Door Camera System | Tech: Python, Flutter, Firebase

- Built an ML-based facial recognition security system integrated with a Flutter mobile app for real-time monitoring.
- Combined computer vision and mobile development into a single end-to-end solution with instant push alerts.

Tailor Management System | Tech: Flutter, Firebase

- Developed a Flutter + Firebase mobile app for a tailoring business with order tracking, customer records, and digital measurements.
- Implemented real-time data synchronisation for seamless business operations.

Sloppy Rush Game | *Tech: Unity Engine*

- Designed and developed a mobile game in Unity implementing physics-based mechanics, level design, and a complete game loop.

TECHNICAL SKILLS

Programming	Python Dart (Flutter) C++ Java React Native
Technologies	Flutter React Firebase OpenCV MediaPipe PyAutoGUI Git GitHub
Database	MySQL PostgreSQL SQL Queries Database Design
Web Dev	HTML CSS Responsive Design (Flexbox) Figma
AI & CS	AI Fundamentals Computer Vision Data Structures & Algorithms OOP
Dev Tools	VS Code Android Studio Jupyter Notebook GitHub Unity Engine
Cloud	Firebase (BaaS) Basic Cloud Computing Concepts

CERTIFICATIONS

- Java Programming – Simplilearn
- Python Programming – CodeAlpha
- Mobile App Development – Simplilearn
- Basic Neural Networks – Great Learning
- Responsible AI: Deepfake Detection Engine – OpenWeaver

LANGUAGES & SOFT SKILLS

Languages: English | Urdu (Fluent) | Sindhi (Fluent)

Soft Skills: Problem Solving | Communication & Empathy | Team Collaboration | Adaptability | Project Management
